CAPTIVATING TIME-WORN PLANKS

Single-face planks and exquisite styling makes Country Relics flooring a choice that makes a statement. Achieving a simple elegance, the carefully selected planks of sawn wood on the surface layer of this engineered floor are double-stained, wire-brushed, hand-scraped, or antiqued. The effects bring out the natural beauty of the wood grain in exceptional detail – and makes every Country Relics floor a unique, hand-crafted look that’s been around, yet carefully maintained.

## Easy to Install

Country Relics flooring features a “click” interlocking profile for easy installation using floating and glue-down methods.

Country Relics flooring is approved for use above, on, and below grade. Installation guidelines can be found at [AwardFloors.com](http://AwardFloors.com).

## Coordinating Moldings

Every room with a wood floor needs perimeter moldings, and usually at least one type of transition molding. Award Hardwood Floors provides a full array of coordinating moldings to finish off your floor in style.

## Easy to Clean and Maintain

One of the advantages of having a wood floor is that it’s easy to take care of.

Simple sweeping and occasional cleaning with a cloth and Award’s specially formulated spray-on/wipe-off cleaner will keep your floor looking great for many years. Visit [AwardFloors.com](http://AwardFloors.com) for more cleaning and care information.

Wood is a product of nature. Variations of color, grain, texture and character are natural occurrences which this sample may not show.

## Country Relics product specifications

The engineered multi-ply glueless tongue and groove planks with a four-sided, bevel-edge, single-faced surface made using 2mm-thick sawn wood enhance the visual and tactile experience of real wood.

WIDTH 5" wide [ 127 mm ]

LENGTH 69.25" long [ 1759 mm ]

THICKNESS 1/2" thick [ 12.7 mm ]

## Country Relics style Country Relics floors feature elements that bring out the elegance and charm of wood:

**SAWN**  
Sawn-cut veneer is lumber sawn in long cuts made straight through the log. The wood shows natural variation in color and grain, including both cathedral and straight grain patterns.

**ANTIQUED**  
Antique-style embossing yields an appearance that simulates the effects of wear and age over time.

**DOUBLE-STAINED**  
Double-staining gives the wood a deeper, contrasting color for enhanced styling.

**HAND-SCRAPED**  
A distressed surface enhances the texture of each wood plank. It provides the hand-crafted appearance of a custom-made wood floor without the expense.

**SCULPTED**  
Subtle 3D sculpting makes a wood floor feel well-traveled. The gentle variations are almost wave-like, detectable by bare feet and by the way light reflects off the floor.

**WIRE-BRUSHED**  
Wire-brushing adds texture to the surface of the wood, enhancing the grain and the saturation of wood stain to bring out the distinct detail of the real wood surface.

## Wearmax® Plus Delivers Superior Wear Resistance

The secret to your Award floor's incredible wear-resistance is Wearmax® Plus Advanced Ceramic Finish.

Developed by sophisticated material formulation technologies, advanced ceramics are nearly as hard as natural diamonds. They're used in high performance engines and aerospace vehicles. Wearmax® Plus harnesses the power of advanced ceramics to provide a finish that goes on clear and exceeds the wear resistance of any of the nearest competitors' finishes, hands down.\*

Wearmax® Plus is a second-generation advanced ceramic finish that resists scuffs and abrasions better, retaining its gloss and like-new look longer. Such increased durability means your floor will stay beautiful under conditions other types of finish just can't handle. It's also stain-resistant and slip-resistant.

\*According to ASTM CS17 and Taber testing.

## Award Ensures Quality

Award Hardwood Floors delivers superior wear resistance and the unmistakable appeal of real wood. It's a unique combination that makes this high-end hardwood flooring practical in even the busiest homes, yet elegant enough to be the focal point of any room. There's never been a better way to bring the beauty and warmth of wood flooring into your home.

Award's experienced craftspeople know wood – grading it every time it is handled – using the most current technology to sample and test the quality of the product at every stage of the manufacturing process. The result is a consistently high quality, natural wood product.

## A Leader in Environmentally Responsible Flooring

Wood floors are a product of nature made from a renewable resource. As a responsible corporate citizen, Award strives to conduct business in a sound, environmentally sustainable way following smart stewardship principles.

GREEN LINK

### Award's Own Green Link Program

We share your priorities. Protecting our forests, environment, and energy resources is a priority with Award Hardwood Floors that begins with our suppliers and carries through to the manufacturing of the finished flooring. Award calls this program "Green Link," and it is our way of contributing to excellence, leadership, and stewardship in protecting our environment.

The mark of responsible forestry

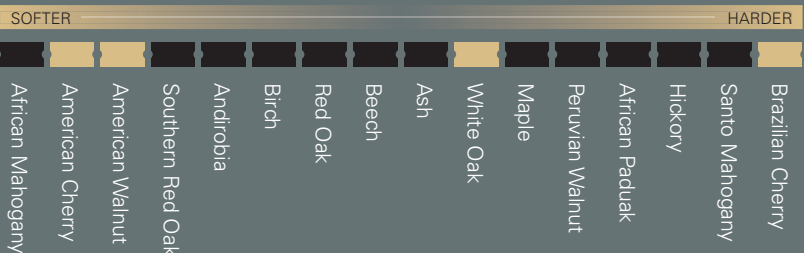

### Award is FSC®-Certified

Award Hardwood Floors is a certified supplier with the Forest Stewardship Council™ (FSC®). FSC® certification ensures that the wood in Award Hardwood Floors comes from forests managed to meet social, economic, and ecological goals.

Chain of custody number: SW-COC-003368

### WOOD HARDNESS RATINGS

Harder woods generally resist indentation better, while actual wear resistance relies more upon the Wearmax® Plus finish.

## Superior Warranty

Your investment in Award flooring is protected by a lifetime wear-through and structure warranty.

The unique properties of Wearnax® Plus Advanced Ceramic Finish and all the care that goes into each product allows Award Hardwood Floors to promise long-lasting beauty and performance. That promise is backed up by some of the best warranty terms in the business.
